# Welcome to iPhoto

iPhoto helps you organize your photos fast, edit them so they look their best, and share them with friends and family. Getting started with iPhoto is easy. If you have questions while you're working, choose Help > iPhoto Help for answers.

## Getting Started

Step-by-step lessons guide you through iPhoto basics.

## Browse Help

Detailed instructions for all the amazing things you can do in iPhoto.

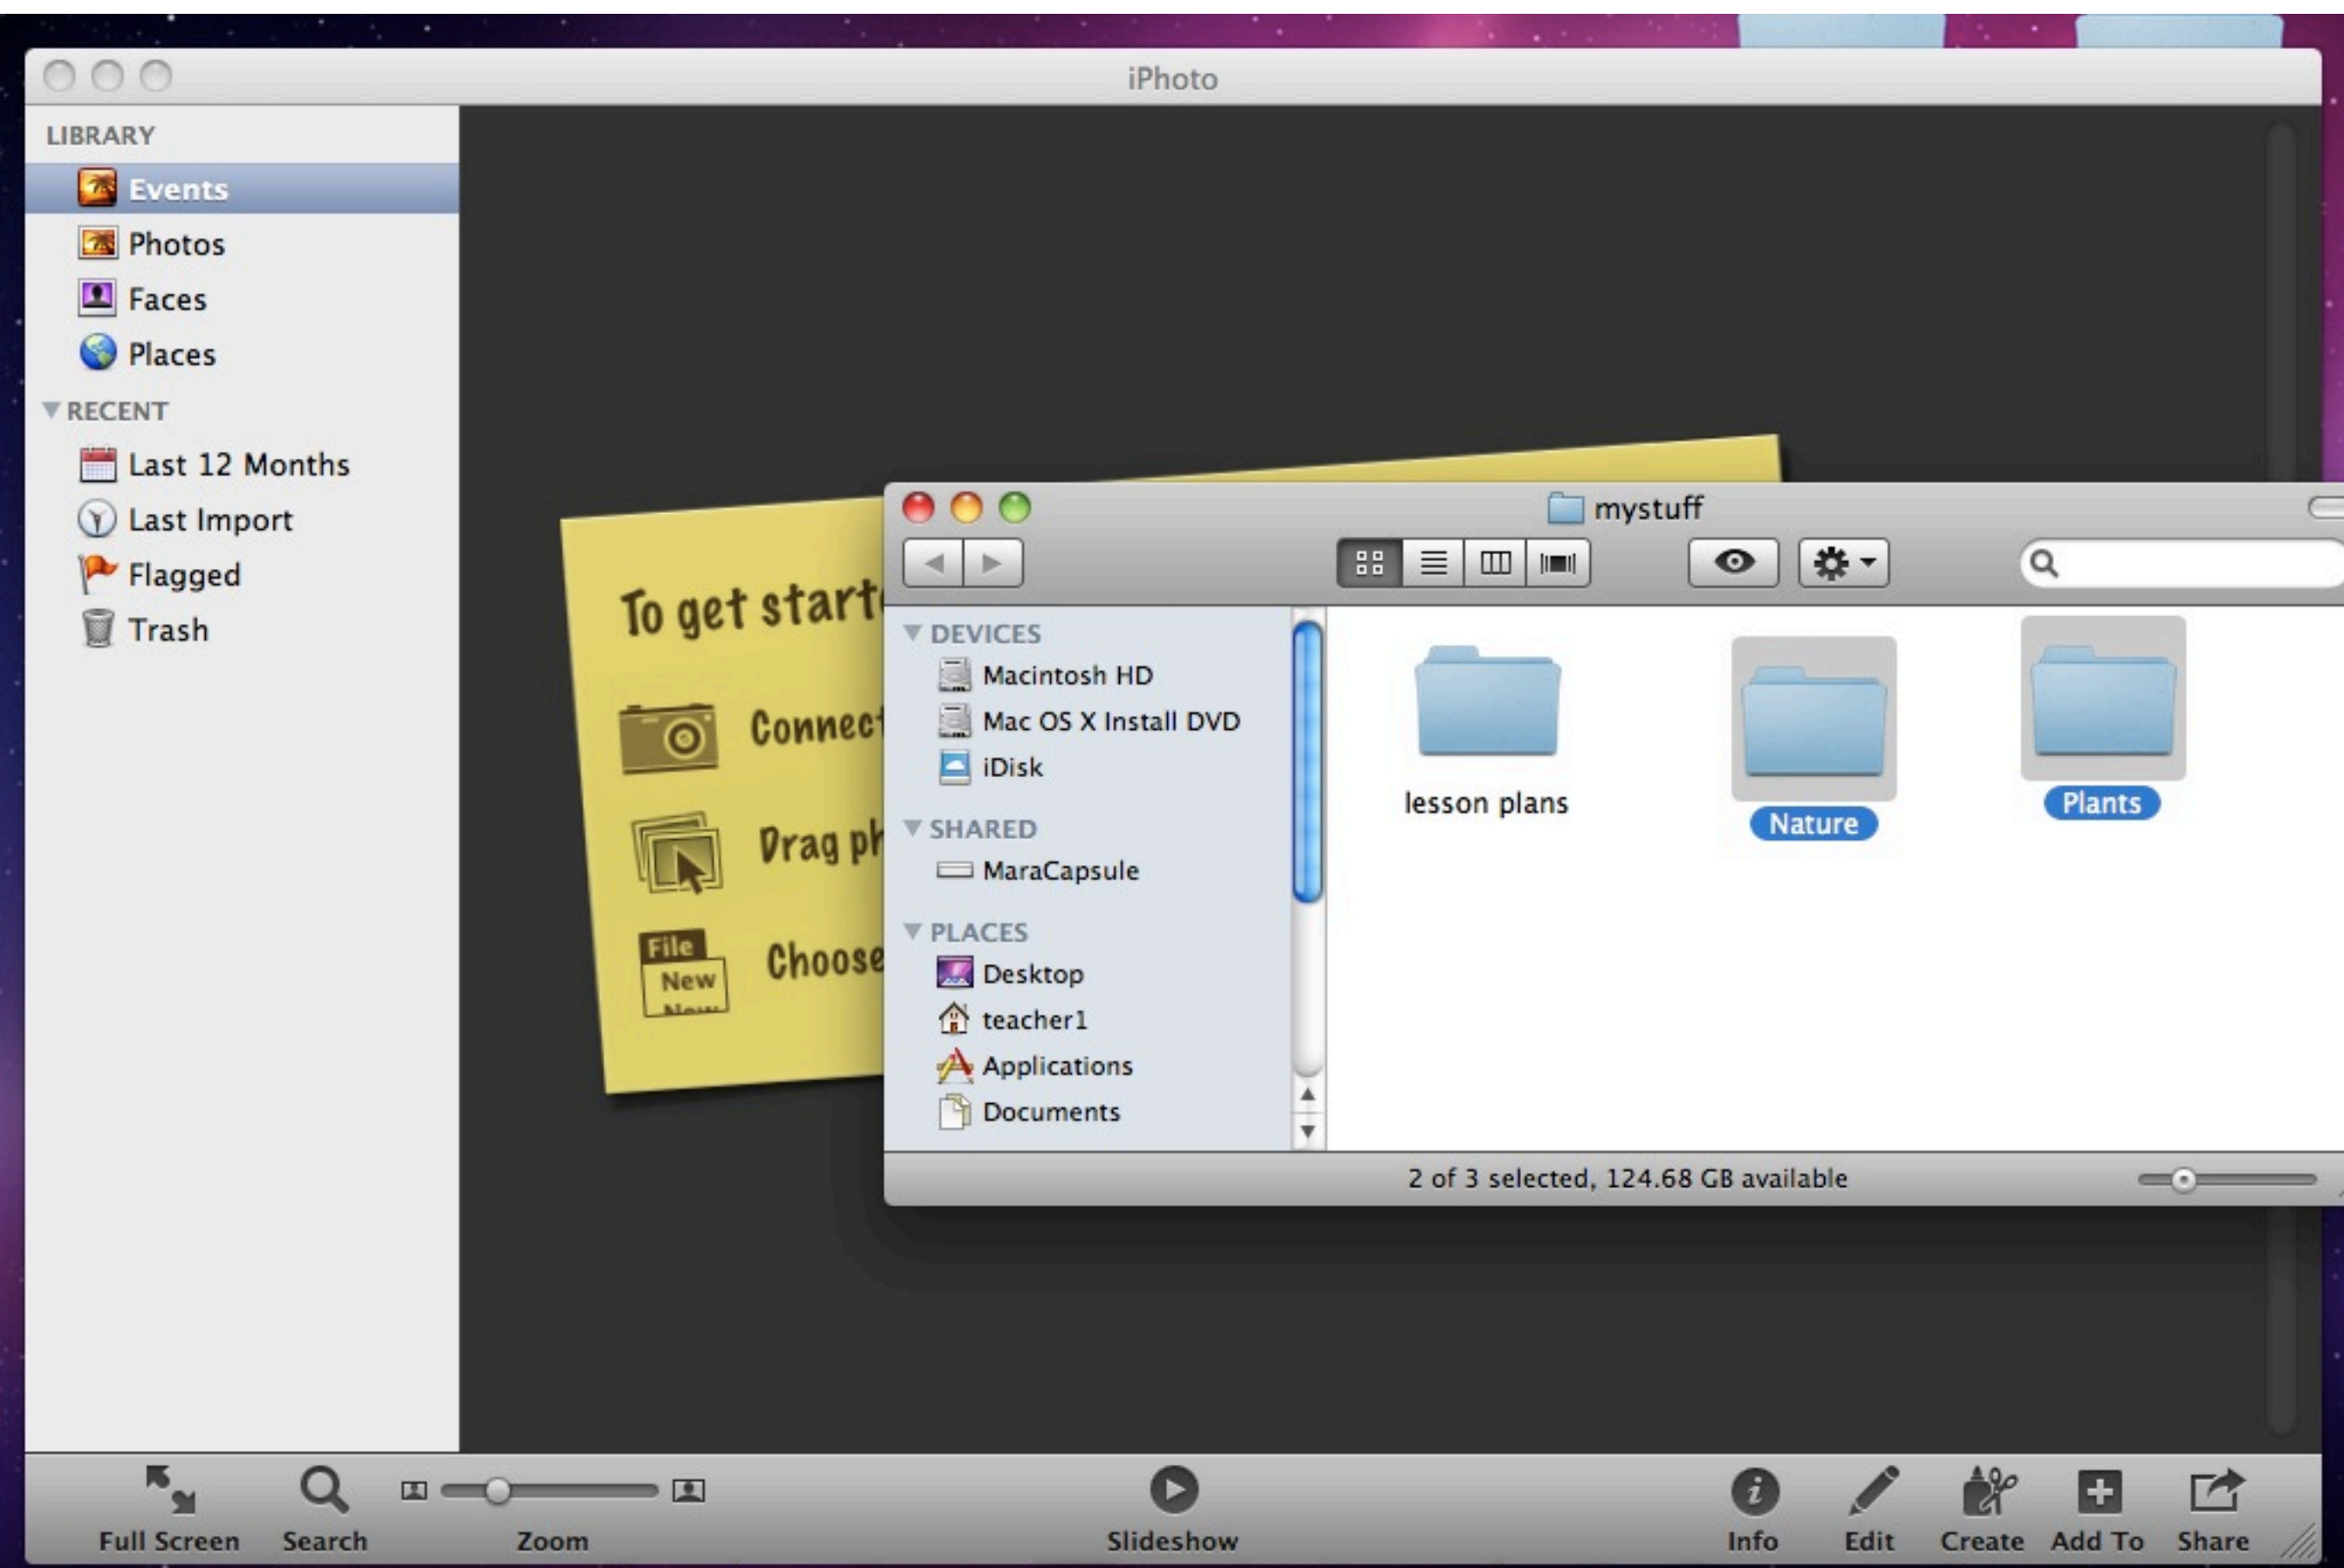

Close

Click Close

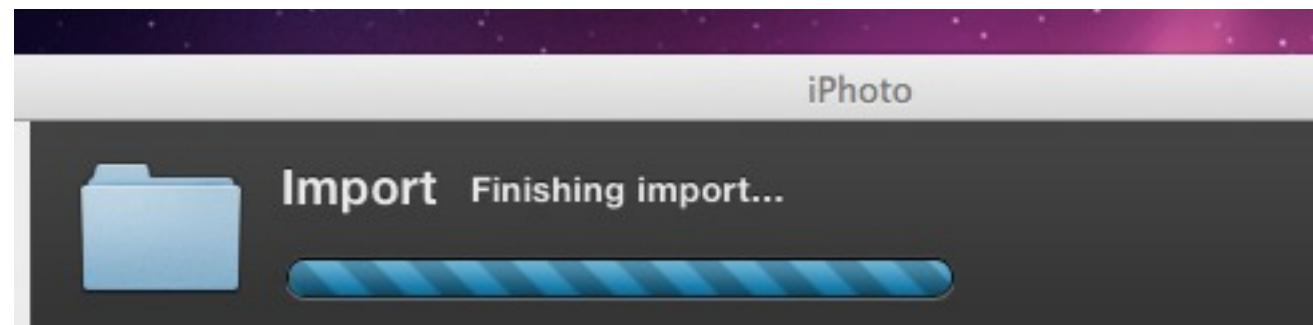

Open my stuff folder

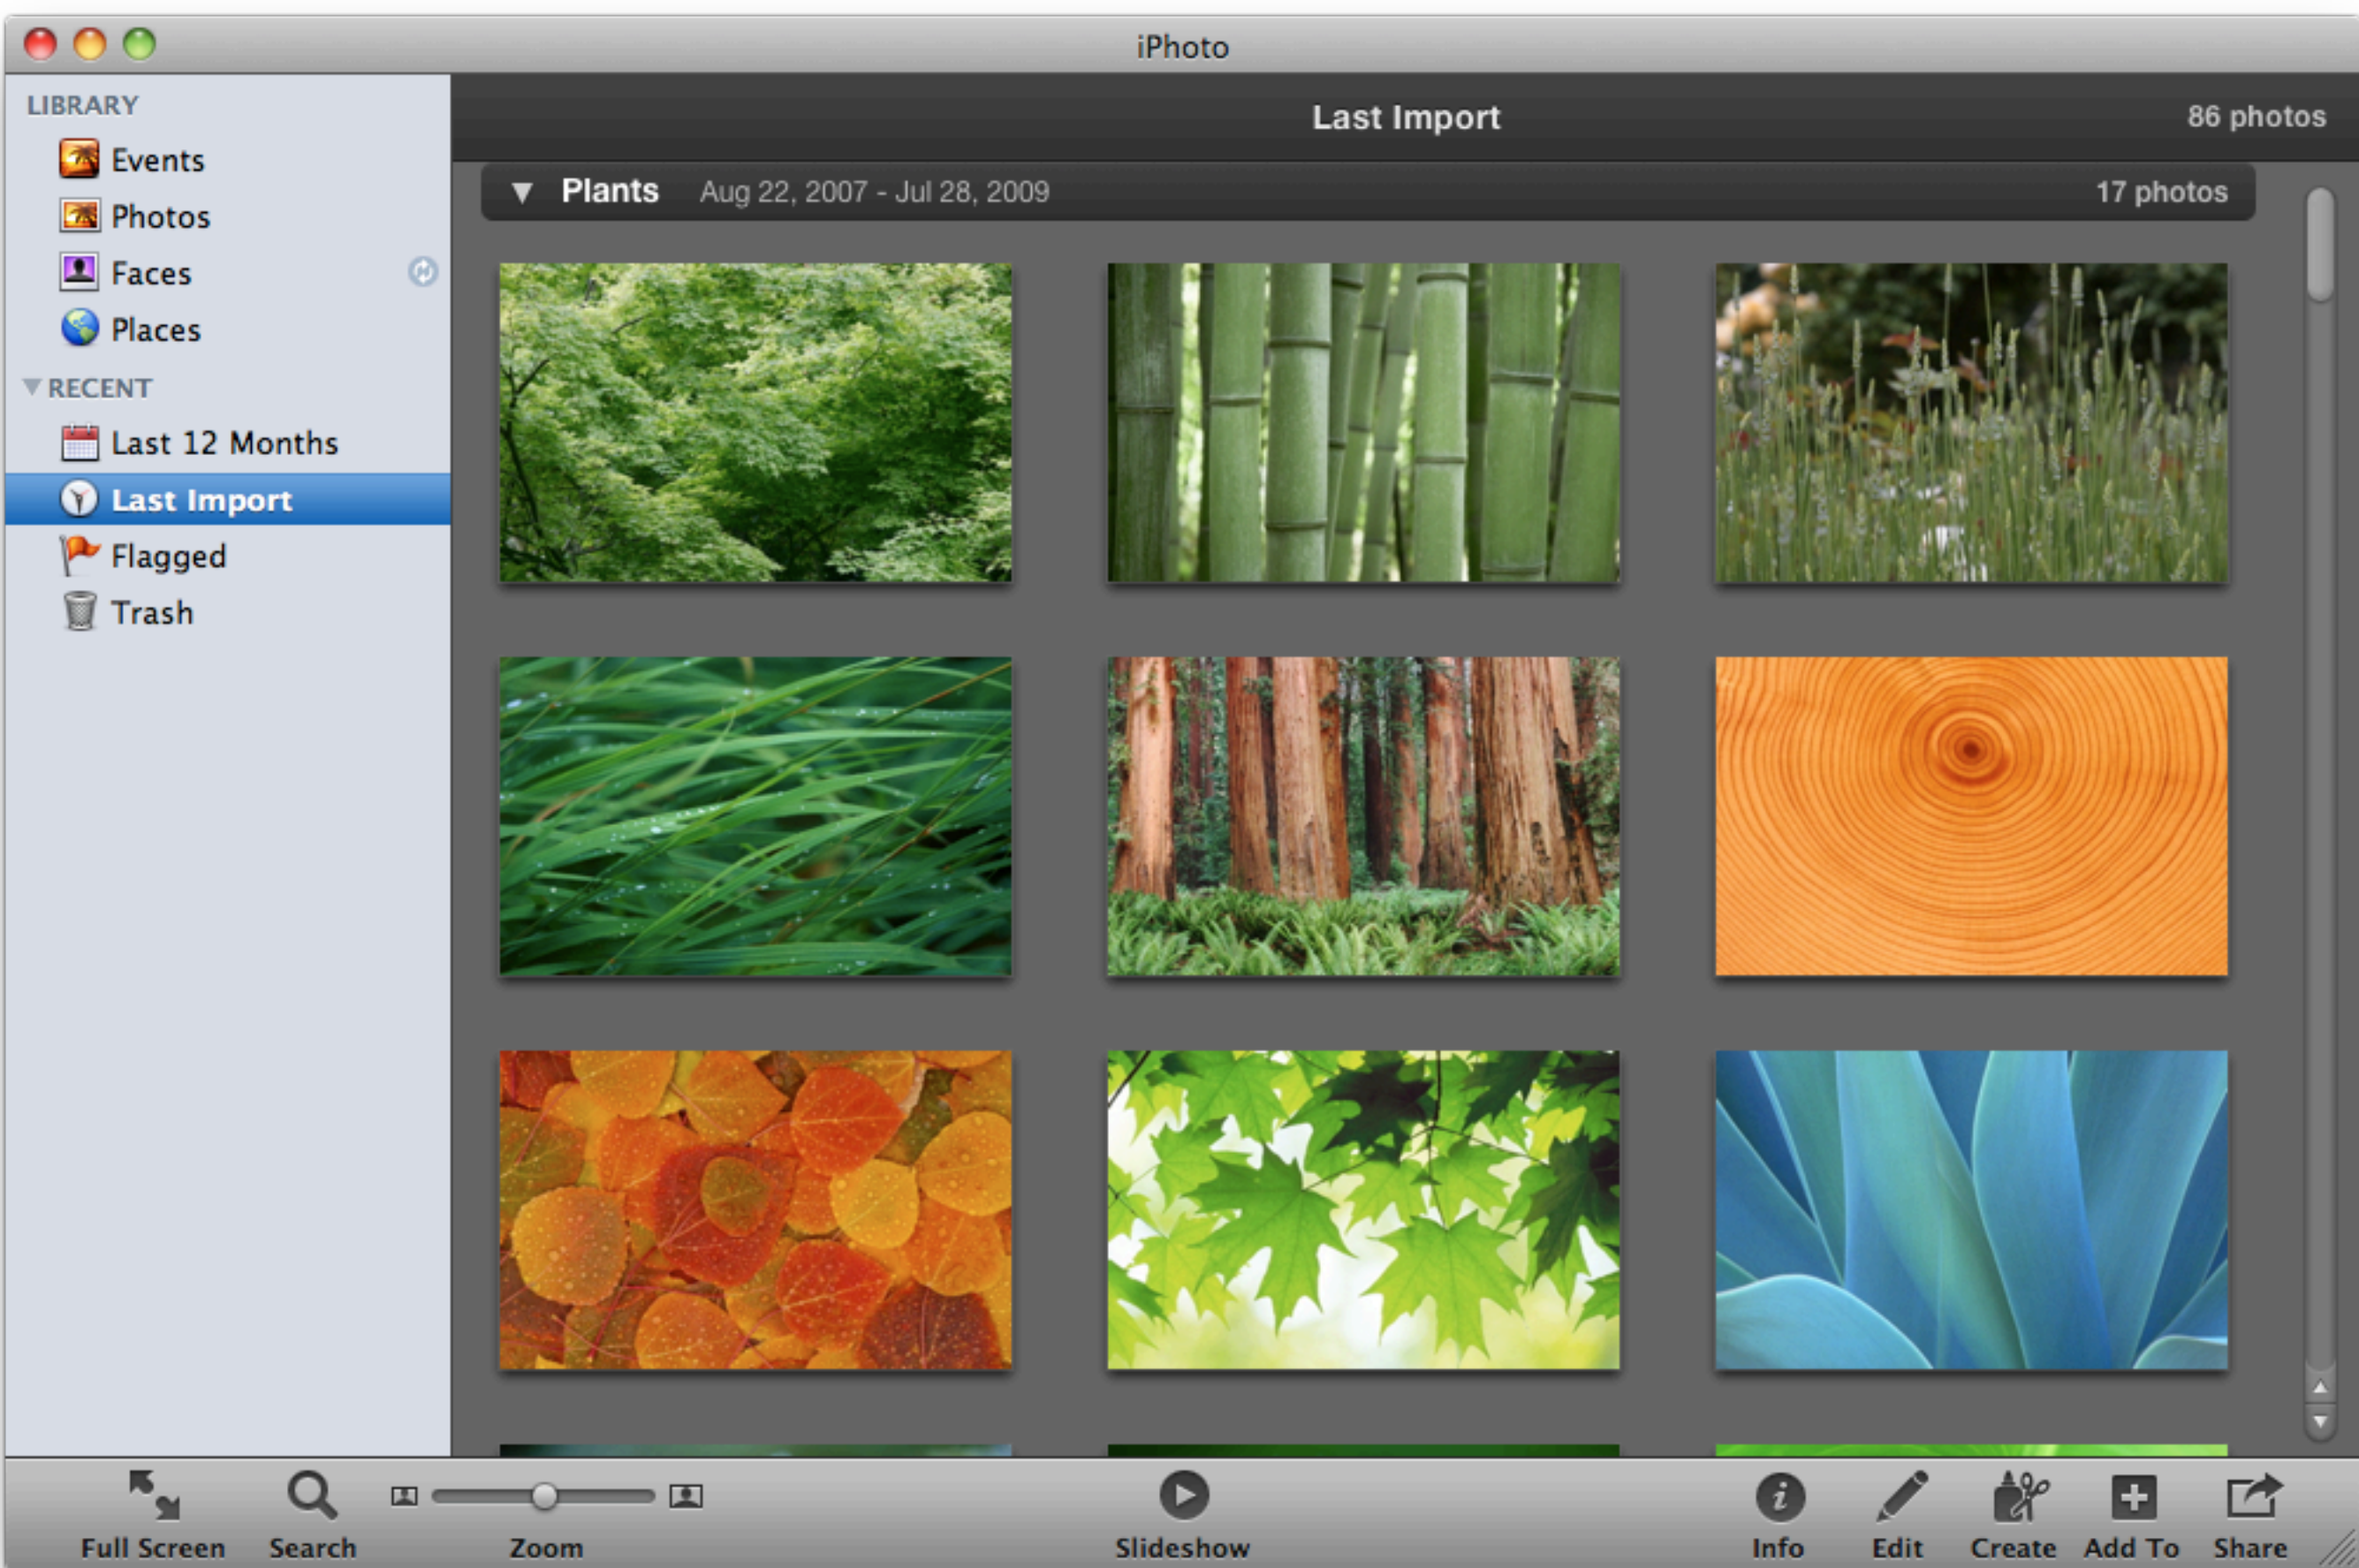

Drag Nature and Plants into iPhoto window

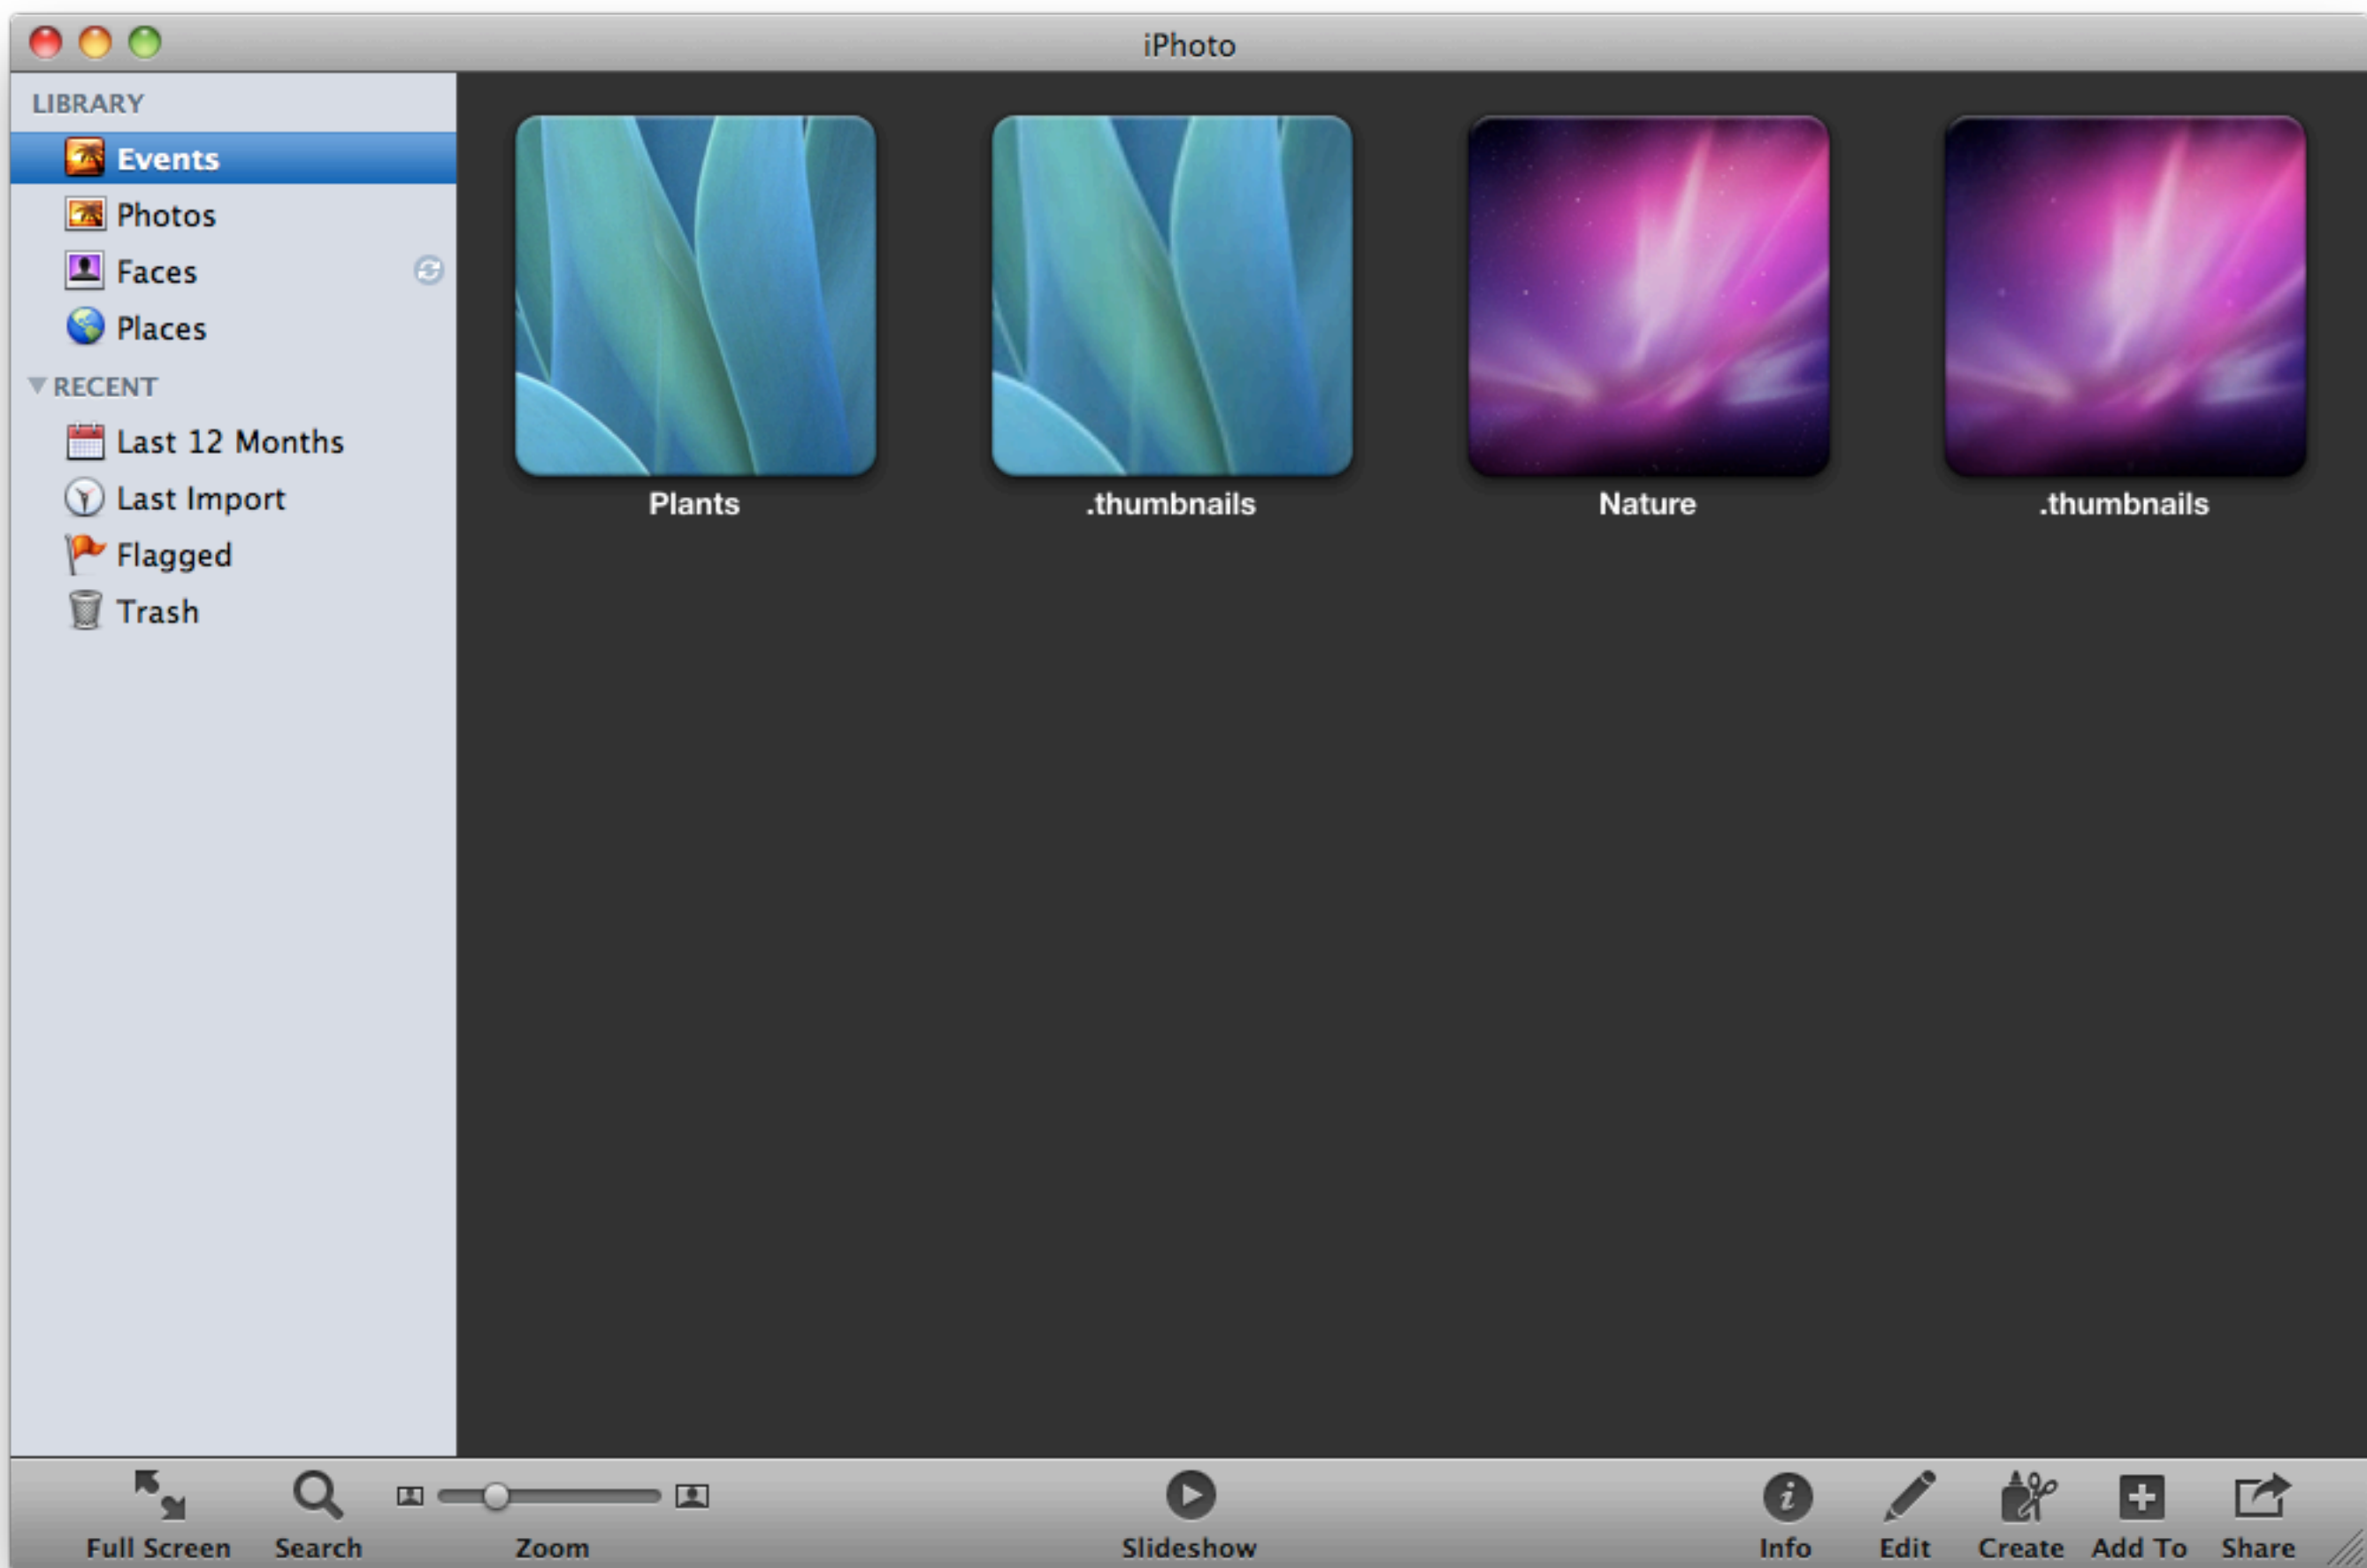

Wait until import finish

All the pictures have been imported. Click Events

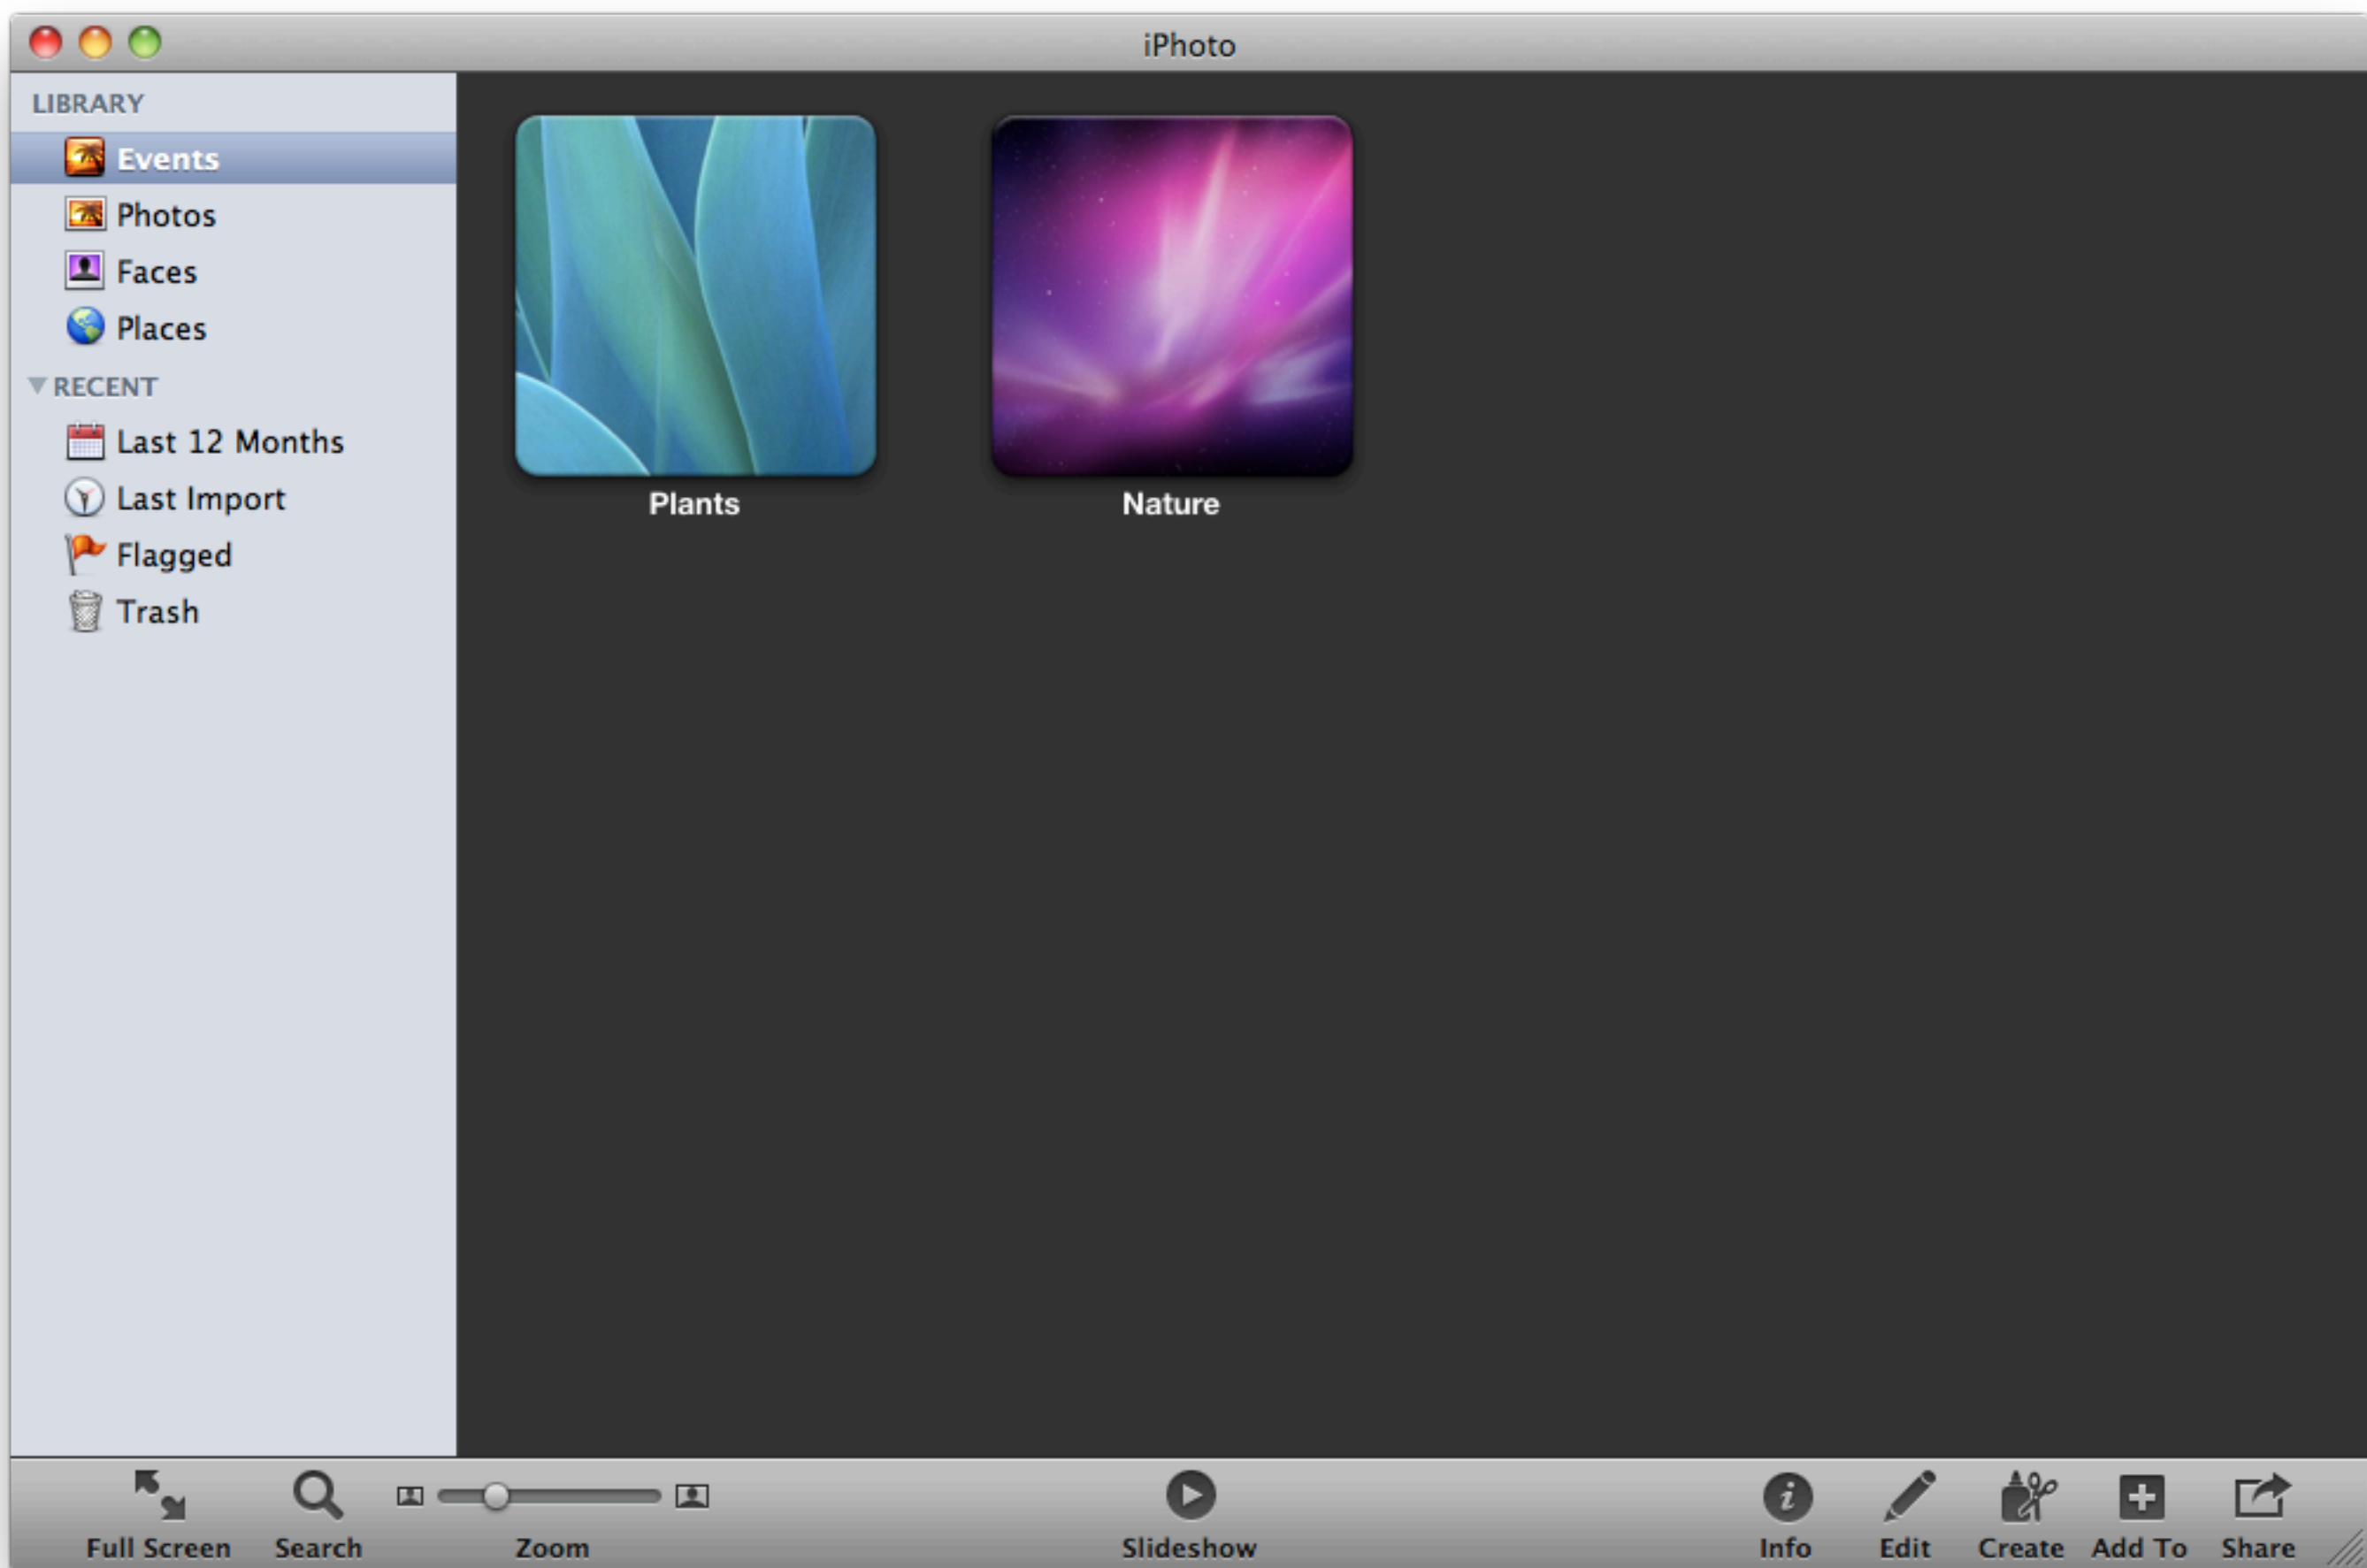

Click on the two .thumbnails folders (Use Command-click to select)

press Command-Delete

Now you have two Events, Plants and Nature

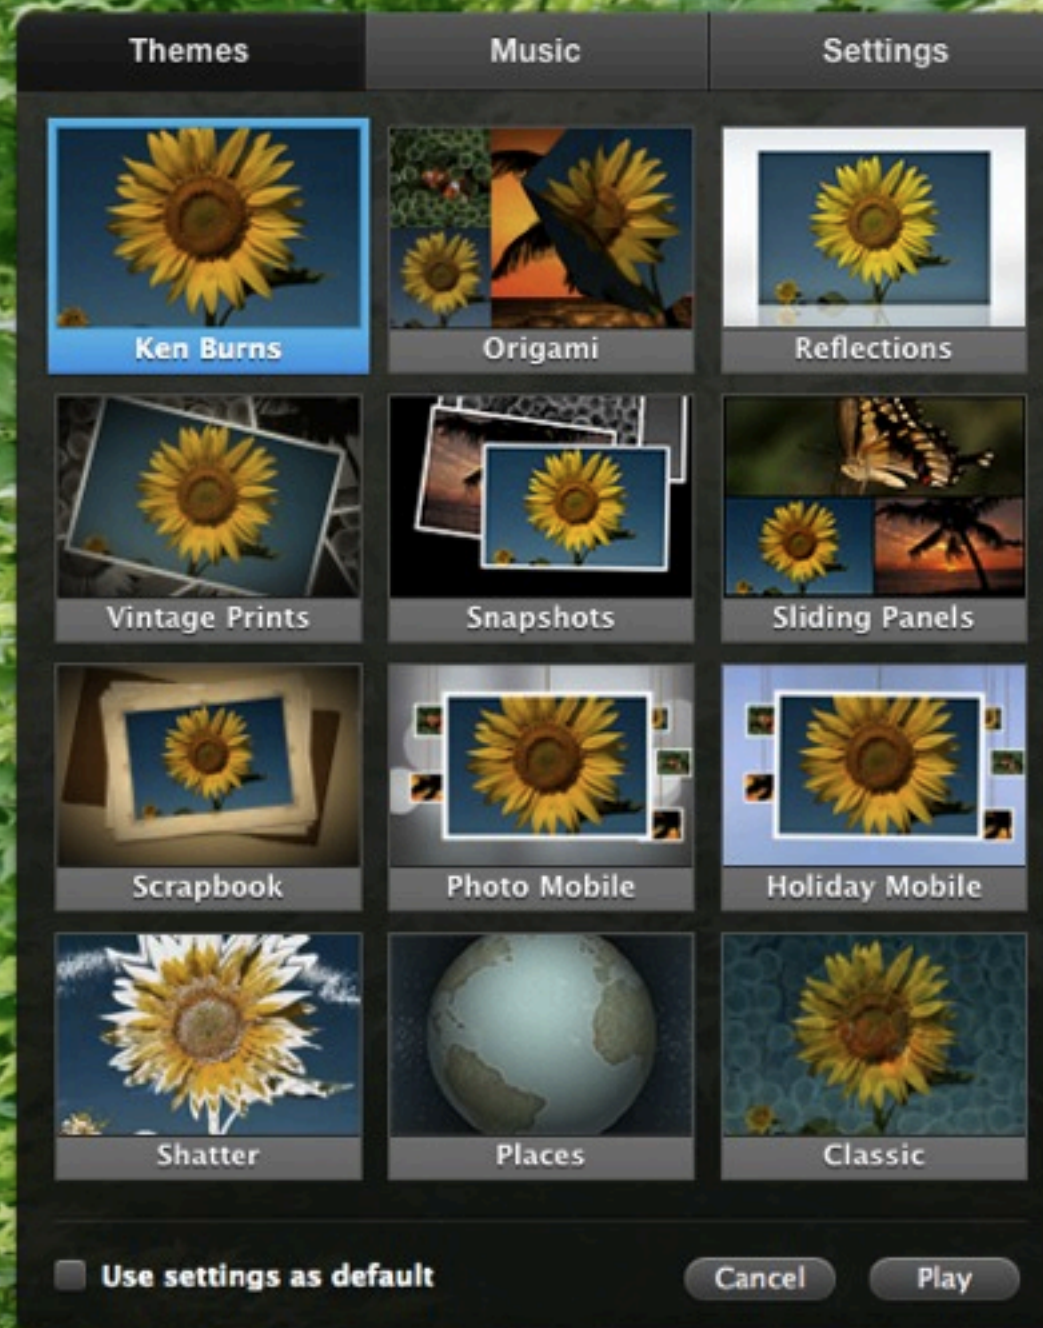

Drag Nature on top of plants and click Merge to merge them

With merged event selected click Slideshow

Choose a slideshow format

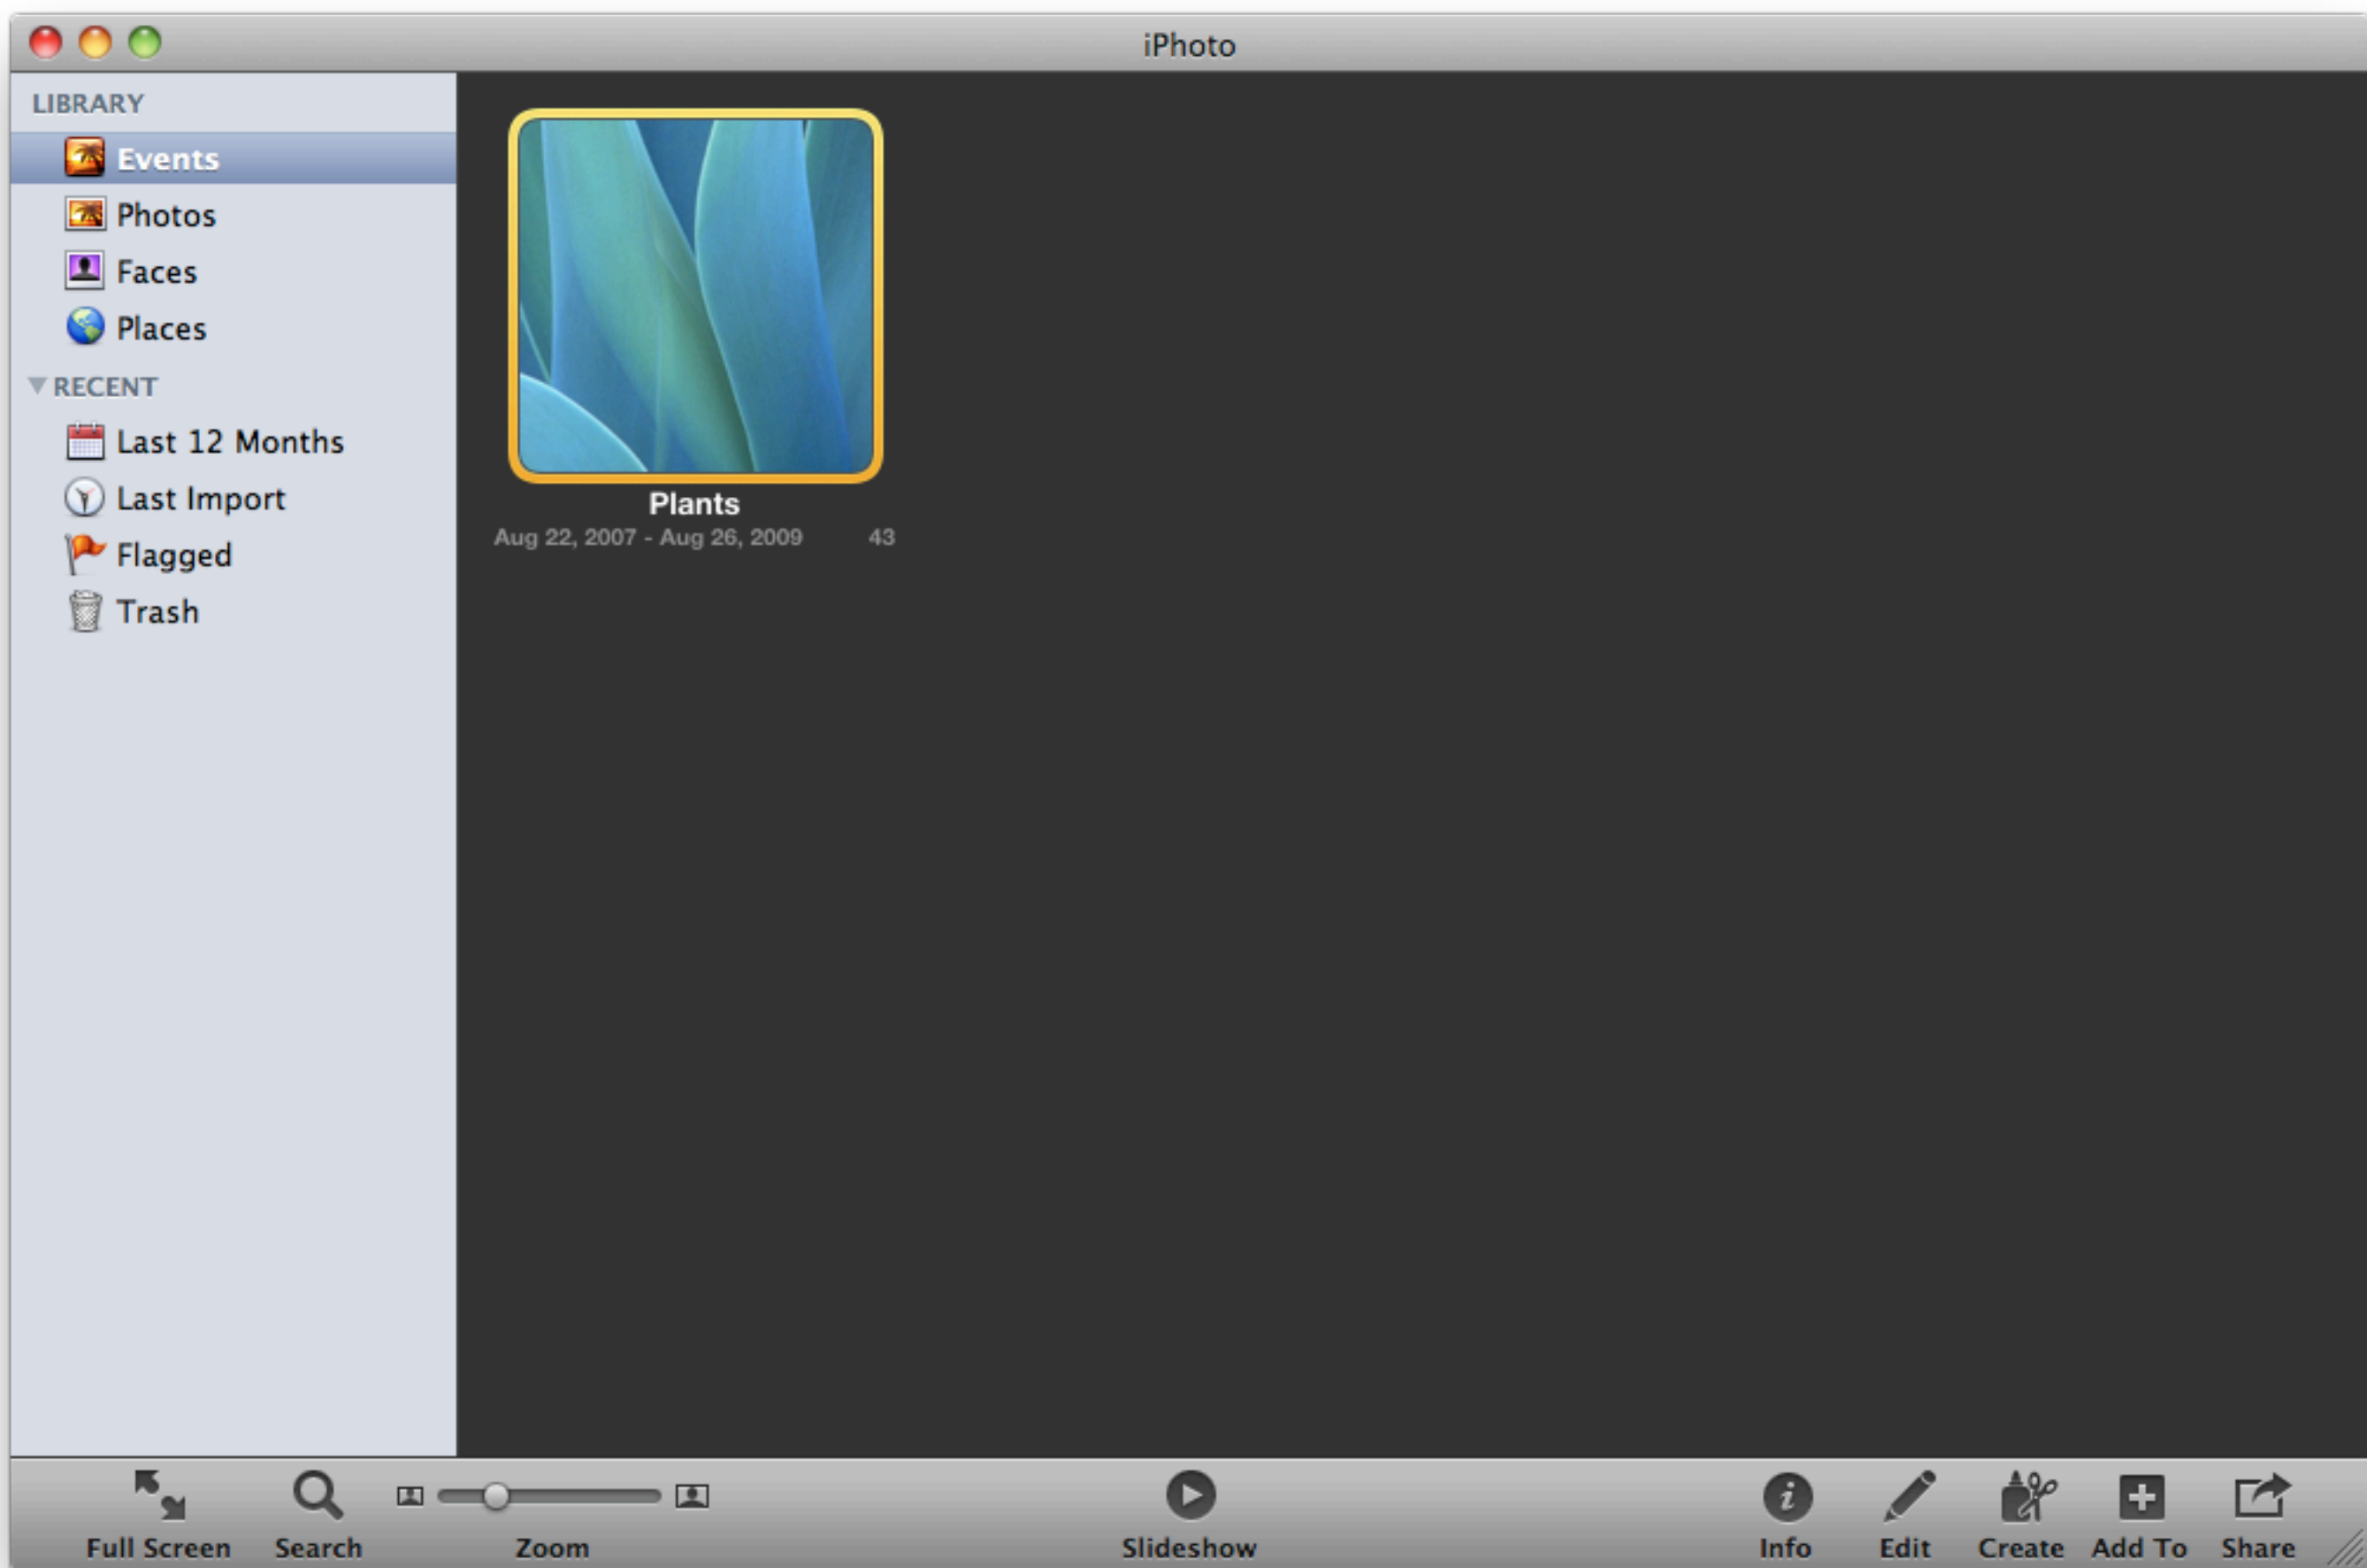

A close-up, slightly low-angle shot of a dense canopy of Japanese maple (Acer japonicum) leaves. The leaves are a vibrant green, with some showing lighter, yellowish-green variegation. The leaves are finely lobed and have serrated edges. The branches are dark and thin, weaving through the foliage. The overall effect is a lush, textured wall of green. The word "Plants" is centered in the lower half of the image in a white, serif font.

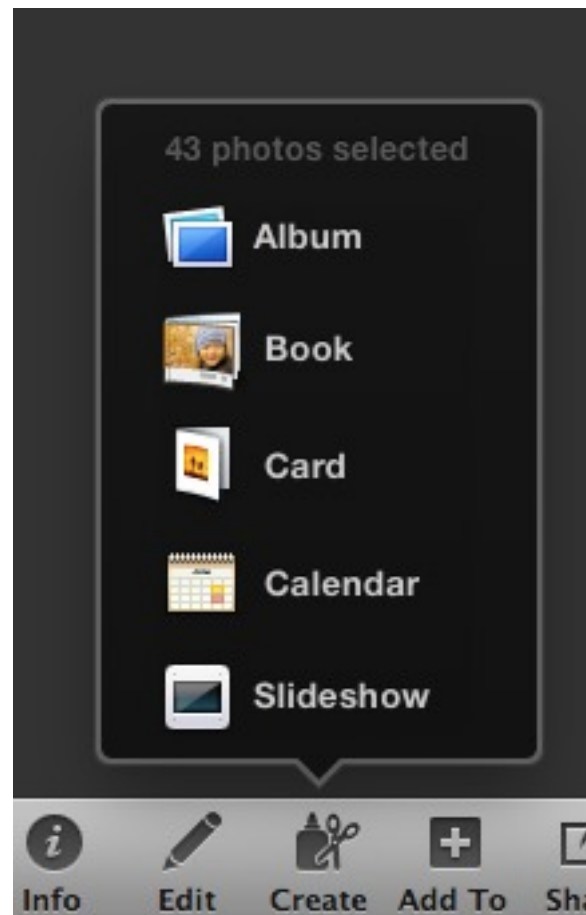

# Plants

Watch slideshow, press Esc to quit

Make sure the event is still selected

Choose Calendar

If you see this popup, choose Singapore

Choose a Calendar design that you like

Start calendar on: January 2011

Number of months: 12

---

Show national holidays: None

Import from iCal:

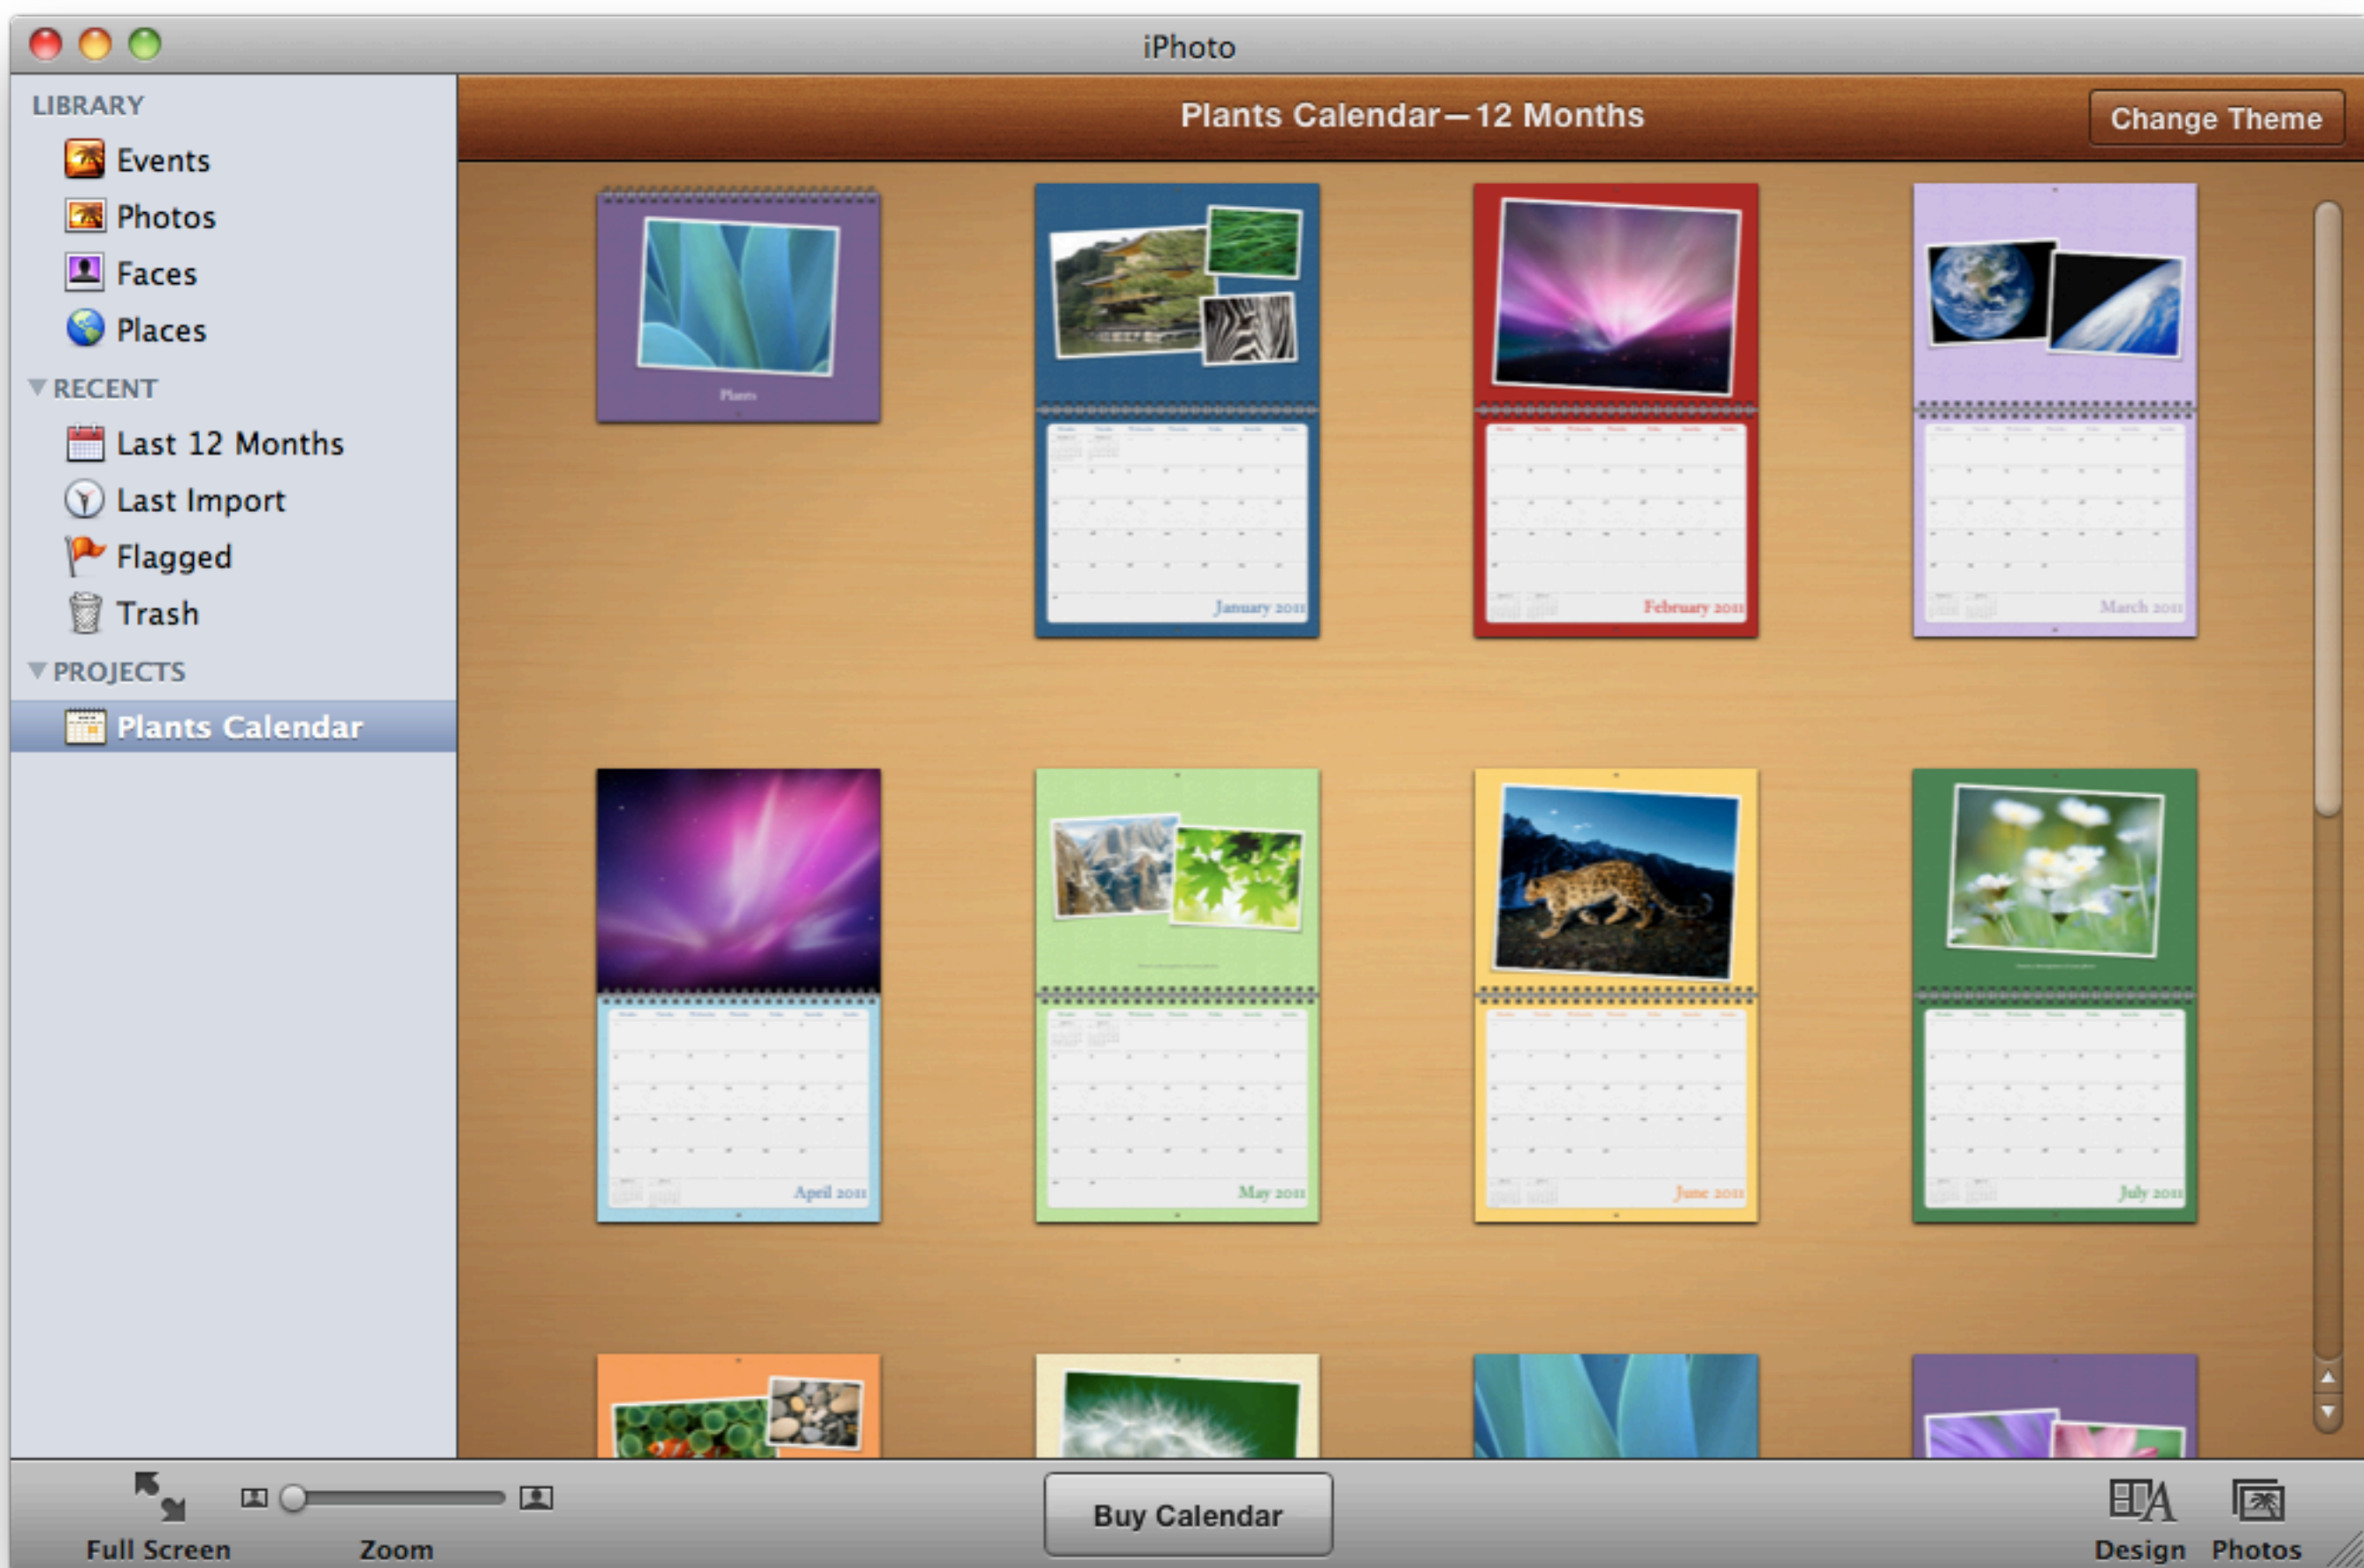

- ☐ Home
- ☐ Work

☐ Show birthdays from Address Book

Cancel OK

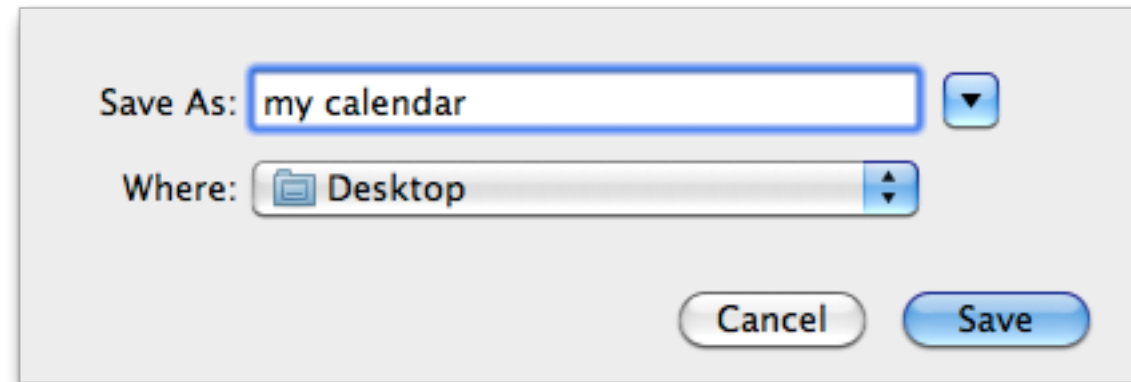

Click OK

Your calendar has been laid out, Option-click Buy Calendar

type in a name and save it to the Desktop

Assembling calendar
